Tender Requirements

Minerva

The University of Warwick Science Park Ltd (UWSP) is one of Europe's leading Science Parks involved in the start-up and development of knowledge based businesses and accommodating international technology companies looking to work with the University. A team of 25 staff manage over 500,000 sq ft of specialised property and operate a number of business support services designed to accelerate the growth of its client companies through innovative access to finance, marketing and technology transfer programmes. The Science Park works closely with the University on business spin-out activities and integrates its business development activities with other providers in the Region.

Minerva is the University of Warwick Science Park's (UWSP) Business Angel Network (BAN), operating throughout the Midlands and the UK since 1993. It offers local, regional and national engagement to companies and investors, which is nationally recognized as being an exemplar service. It also supports many entrepreneurial activities within the university bringing "Real World" experience to students and courses.

This interim requirement arises from the retirement of the previous lead and will be expected to maintain the current Minerva activity while a recruitment process for a full time permanent Head of Minerva is concluded.

The current format utilizing investor groups (MIG) has been operating since 2009 since when it has handled 1200+ enquiries, reviewed 800+ propositions resulting in in over 300 companies making 600+ investor presentations.

The Network's Business Angels are independent and entrepreneurial who provide an invaluable source of equity and seed investment for early stage (high risk) businesses as well as knowledge and experience. They may also take on Non-executive board roles, filling skills and knowledge gaps and participate in companies' business development. Minerva Business Angels have invested in a wide variety of sectors at varying stages of growth and the Network has a reputation for working with early stage technology enterprises and spin-outs from Universities in particular. Facilitated by the successful bidder, investors currently meet approximately 9 times a year in small groups at each of 6 locations around the Midlands region (Warwick, Birmingham, Gloucester, Loughborough, Lincoln & Stourbridge) to discuss opportunities.

The bidder will work with companies seeking investment to prepare for presentation to the Network. Handling c4-6 opportunities at any one time the bidder will ensure each group sees all the proposals at a rate of c3 per meeting over 6-8 week timescale.

At these meetings an important element is when, post presentations time is given over to a review of the proposals seen, assisting if needed with any actions agreed, encouraging an exchange of views and information with investors and summarizing progress of earlier investments - all of which is managed, collated and presented in a professional manner by the Minerva team.

Ultimately the Network is funded by deals being completed, hence a key requirement is achieving on average 10 new investments each year which with a similar number of follow on funding round completions yields a total average Investment by members of £1.2m pa.

Minerva operates as an FCA exempt activity, therefore it is essentially that the bidder understands and is comfortable with operating within a heavily regulated and governance led sector to ensure all activities remain exempt.
